		`Identified:`

	uppercase and lowercase N-with-tilde. ● \s: Allows spaces. ● ': Allows apostrophes. ● \-: Allows dashes/hyphens. ● \.: Allows periods.	person_id<->first_name 010-P030676977088-01<->EDILNI?O /* Implementation Option: Tagging using Trigger AFTER INSERT upon migration and stored in a column 'remarks' or another table's column. */

10	Empty String in non-nullable columns Example: Firstname with " " or "" values.	/* For validation in the field to get the value */ For Identification: SELECT column FROM table WHERE CHAR_LENGTH(TRIM(column)) = 0; To Remove: UPDATE TABLE tbl_name SET column = NULL WHERE CHAR_LENGTH(TRIM(column)) = 0; Application: Set values to NULL if Column contains only space(s).
